PRESENTS

DISASTER & EMERGENCY PREPAREDNESS AND MANAGEMENT

DEPAM

TRAINING PROGRAM

(1,3 & 5 DAYS)

OBJECTIVE

India with its unique geo-climatic conditions is often subjected to varied types of natural phenomena which causes enormous destruction and human suffering, while losing about 2% of its GDP every year due to disaster. Think of disaster and the images of earthquake, floods, tsunami, cyclone, flash through the mind. Fortunately, disaster and emergency occurrences are seldom, unfortunately when they come, they do not announce their arrival time and place, even worse is their merciless nature of not sparing anyone and anything. UNIQ Academy has developed a capacity building professional training program, which will professionalize disaster management, guidelines for policy, SOP & BCP formulation and effective first response mechanism

WHO SHOULD PARTICIPATE

“It is better to have plan in place and never have to use it than not to have one and find you needed it.” The DEPAM training program designed by UNIQ Academy is beneficial to everyone across the spectrum of society. Building resilient neighborhood, community, industry and individual emergency preparedness is useful to everyone. People should be exposed to the nuances of disaster and emergency preparedness. Middle and Operational Managers

PROGRAM CONTENTS

The program will cover natural and man-made disasters affecting enterprises. Some of the Do's and Don'ts contained are extremely relevant for security & safety managers. The program also encompasses guideline for formulation of Business Continuity Plan (BCP) and to develop Information Management System (IMS) and provision of a sound and healthy work atmosphere for a better Business Continuity. **The program Includes :** 1.Understanding and application of disaster management cycle. 2.Application of elements of disaster management. 3.Disaster response in India. 4.Guidelines for preparation of SOP and BCP.5.Risk management and loss prevention. 6.Nuclear, Biological, Chemical & Radiological treats. 7.Futuristic trends in disaster management. 8.Training of emergency response team.
